REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest a method at compile time of comparing calling and called programs register length; wherein when calling program is greater, selecting a first linkage service storing least significant portion of an entirety of register contents in one location and most significant portion of same in a second location such that called program accesses least significant portion and not the most significant; when calling program register length is less, storing entirety of register contents in a third location for access by the called program as recited in independent claim 41. Claims 46 and 51 are allowable for the same reasoning.

The prior art of record, **System** and **ESA**, disclosed system of differing register lengths and calling/callee programs. The prior art further demonstrated various processor commands and structures used to pass information between programs of differing contexts. However, **System** and **ESA** failed to disclose a method at compile time such that a determining calling/callee register lengths and linkage service based thereupon as recited in the independent claims.

The prior art of record, **Coutant**, disclosed differing layouts of saved information. However, **Coutant** failed to disclose the independent claims as recited.

The prior art of record, **Breslau**, disclosed compile time generation of programs for differing architectures. However, **Breslau** failed to disclose the independent claims as recited including comparing register lengths.
